SoundStation VTX 1000™

Integrates with the new Polycom QSX, as well as Vortex Installed Voice Systems, Global Management System, plus VSX 7400 and VSX 8400 video conferencing units!

Revolutionary voice quality and clarity from up to 20 feet away

Have you ever wasted time on inefficient conference calls by continuously having to repeat yourself or shout into the phone to be heard? Well, Polycom has a revolutionary solution. The next generation of conference phones is here!

Introducing the SoundStation VTX 1000:

- No more shouting into the phone
- No more huddling around the phone
- No more, "I didn't hear that. Could you please repeat yourself?"

The SoundStation VTX 1000 enables you to speak naturally from 2 feet to 20 feet away from the microphone, so those on the remote end of the call can hear you clearly – leading to increased productivity, faster decision making, a higher competitive advantage, and much happier conference call participants

As the world's first high-fidelity, wideband conference phone, the SoundStation VTX 1000 covers the full range of the human speech spectrum, making every voice, word, and syllable crystal clear – you'll think you were all in the same room! It's like going from black-and-white to color TV.

And, you can download new software for additional features and functionality simply by dialing a number right from your SoundStation VTX 1000 – that's built-in investment protection!

Now is the time to experience the SoundStation VTX 1000. It's the perfect solution for any size conference room and will provide full room coverage for a 54' x 40' room.
